College of Medicine
University of Kentucky
Lexington, Kentucky

The Kentucky Perinatal Association

The KPA was founded in 1988 and includes maternal and infant healthcare representation from across the Commonwealth of Kentucky. In its 21st year, the KPA recently earned the distinction of being honored the “State Initiative Award”, as the best state chapter in the nation by the National Perinatal Association.

Our current focus is a partnership with state health agencies, in a campaign to decrease “late term births”, reducing perinatal morbidity and mortality. The Kentucky Perinatal Association is a non-profit incorporated, volunteer association of health care providers and organizations with a common purpose toward the recognition of maternal-infant health care issues dedicated to the provision of efficient solutions through educational outreach and advocacy.

Ongoing planning for Educational Outreach Projects, such as HPEP I & HPEP II have increased visibility through Internet access as signs of our commitment to our purpose and objectives.

Our upcoming perinatal conference will focus on the “Implications of Late Term Birth & Beyond”. We have carefully invited interested professionals to share current trends in reducing prematurity and subsequent high risk births.

Continuing Education

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council of Continuing Medical Education (ACCME) through joint sponsorship of the Kentucky Medical Association and Kentucky Perinatal Association. The Kentucky Medical Association is accredited by ACCME to provide continuing medical education for physicians. “Kentucky Perinatal Association (Provider # 2-0006-01-10) will award 9.9 KBN approved nursing CE contact hours for the June 1-2, 2009, program. (5.5 hours for Monday, 4.4 hours for Tuesday) All sessions must be completed and evaluations submitted to receive CE credit. Kentucky Board of Nursing Continuing Education units are awarded based on length of course and successful completion. KBN approval of an individual nursing continuing education provider does not constitute endorsement of program content.”
